Summary

Backend-focused Fresher Developer with hands-on experience in **Java (Spring Boot)** and **microservices**. Built and deployed production-ready services with **Docker**, **Nginx**, **Keycloak**, and **Liquibase** on VPS/AWS. Comfortable with **REST API** design, authentication (**OAuth2/JWT**), and **MySQL**. Also capable on the frontend with **Next.js/TypeScript** when needed.

Experience

FJS System (Internship - 6 months)

- Gained hands-on experience in backend development using **Java** and **Struts**.

Antoree (Frontend Developer - 3 months)

- Developed frontend applications using **Next.js** and modern web technologies.

Technical Skills

- **Programming:** Java (Spring Boot, Core Java, Java 8+), TypeScript, JavaScript
- **Backend:** Spring Boot, Spring Security, OAuth2/JWT, REST APIs, Microservices (JHipster), Keycloak, Liquibase, Struts
- **Frontend:** Next.js, React, Tailwind CSS
- **Databases:** MySQL, PostgreSQL
- **Tools:** Git, GitHub, Git-flow, Maven
- **Cloud/Deployment:** Docker, Nginx, VPS, AWS (EC2, RDS, S3), Vercel
- **Testing:** JUnit (basic)

Projects

RideHub - Travel Ticket Platform

GitHub: [RideHub Repository](#)

Live Demo: [Demo](#)

Team Size: 2 members

Role: Backend development, deployment workflow, and integration of enterprise-grade technologies

Overview: A travel ticket booking platform using microservices architecture.

Key Contributions:

- Designed a scalable backend using JHipster microservices and Spring Boot.
- Set up production deployment workflow with

Docker, Nginx, and VPS.

- Implemented Liquibase for automated DB migrations.
- Integrated Keycloak for centralized authentication and role-based access.
- Configured API Gateway for service orchestration.

Technologies Used:

- Backend: JHipster, Spring Boot, Redis, Consul, Liquibase
- Frontend: React with TypeScript
- Database: MySQL
- DevOps: Docker, Nginx, VPS

Book Store Application

GitHub: [BookStore Repository](#)

Technologies: Java, Spring Boot, Next.js, AWS Services (EC2, RDS, S3, Tebi), GHN, VNPay

Key Features:

- Developed advanced book sorting and filtering functionalities.
- Implemented secure authentication with **OAuth2**.
- Built a **scalable cloud-based infrastructure** on AWS, supporting up to **2 million book records**.
- Integrated online payment via **VNPay** and shipping services with **GHN**.
- Planned optimization of search queries using Elasticsearch.

Adam Store - E-commerce Platform

GitHub: [Adam Store Repository](#)

Live Demo: [Demo](#)

Technologies: Next.js, TypeScript, Tailwind CSS

Team Size: 3 members

Role: Frontend development and design pattern implementation

Overview: Developed a modern e-commerce platform featuring professional development workflow and modern UI/UX design.

Key Features:

- Modern e-commerce interface built with Next.js and TypeScript.
- Responsive design using Tailwind CSS and modern design patterns.
- Professional Git-flow workflow with automated deployment.
